

Working together

phs Group recently commissioned expert research in partnership with Prostate Cancer UK. This involved surveying 500 men who are living with urinary incontinence, half of which had been diagnosed with prostate cancer.

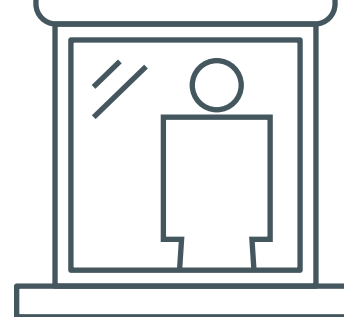

The results* are clear. Men with urinary incontinence need our support:

Over a third have found it hard to locate public bins for incontinence waste disposal.

1 in 5 have had a bad day as a result of inadequate washroom facilities.

38% of those who experienced poor washroom facilities now leave the house less often.

Let's Dispose with Dignity

The newly launched **phs** Male Incontinence Bin and Bag Dispenser has been designed to ensure washrooms are a safe space for people living with urinary and bowel incontinence.

Washroom servicing on Electric Bikes

In March, our first-ever E-Rider Washroom Service Technician started their rounds from our Camberwell Operations Centre. They will be using a specially designed electric bike and trailer to provide more-efficient and environmentally-friendly city centre servicing.

Working together to reach your net zero commitments

A jobs fair with a twist for our Interns

phs have been working with Bridgend College and DFN Project SEARCH since September 2021. To further prepare this year's interns for the workplace, a reverse job fair was recently held at our Caerphilly Office. The reverse job fair asked businesses to visit stalls hosted by each intern. This gave the interns a chance to showcase their skills and experience.

Explore our extensive range of consumables

Our contracted consumables service is designed to take away the hassle of re-ordering stock. We'll automatically dispatch what you need, when you need it.
